

SINGLE STAGE JET ASSISTED PUMP

FEATURES & BENEFITS

PUMP

- Single stage jet assisted centrifugal with closed vane impeller
- Brass pump shaft sleeve
- Mechanical shaft seal

MOTOR

- Davey manufactured
- 2 pole, 2850rpm, 50Hz
- TEFC with IP55 enclosure
- Class F insulation
- Permanently split capacitor design
- Double contact sealed C3-HTG rated ball bearings
- Protected against both high operating temperatures and high current by a built-in automatically resetting thermal overload

- All models supplied with 2m long power lead fitted with Australian 3 pin plug
- Manufactured from highest quality corrosion resistant materials
- Compact foot print for quick and easy installation
- TEFC motor corrosion resistant and excludes dust and dirt
- Motor and pump designed for frequent starts
- Every unit individually tested to guarantee reliable operation
- Low maintenance
- Easy to service if required
- Reliable and proven performance

INSTALLATION AND PRIMING

- On installations with suction lifts over 1m, a good quality foot valve should be fitted. In this case the in-built check valve must be removed from the suction inlet before installing suction piping.
- The system is primed by filling the pump and suction line with water through the priming port, and replacing priming plug prior to switching on.
