

# Pressure Pump

## Hydrojet HJ140

### Domestic water pump

#### Application

The Hydrojet 140 is a powerful stainless steel jet pump  
Suitable for small to large houses where tough suction conditions exist

#### Design Features

- Fully automatic
- In-built run dry protection
- Suitable for mains and low pressure systems
- Two year parts and labour warranty
- Very low maintenance
- Suitable for use with above or below ground water tanks, wells bores and spear points
- Provides constant pressure at constant flow

#### Technical Data

Construction Case/Impeller	S/Steel S/Steel	Power Supply	230v/1ph/10amps
Operation	Presscontrol	Inlet (mm)	25
Pump Type	Jet	Outlet (mm)	25
Pressure Tank Options	8 L optional	Maximum Head (m)	45
Motor (kW)	0.8	Max Flow	75 LPM
Full Load Current (amps)	5	Weight (kg)	12.5
Dimensions (mm)	Length 390 x Width 230 x Height 500		

#### Pump Performance

NOTE: The above Performance graph is measured at pump outlet and based on factory test conditions.  
Actual performance onsite may differ due to piping and fixture sizing and layout
